Molecular and Cellular Biochemistry **246:** 197–201, 2003.

Index to Volume 246

Ahmed N, *see* Duraisamy Y *et al*
Aires Ferreira Rodrigues Borges A and Moreira Gomes O: Effects of midazolam on the contraction and relaxation of segments of thoracic aorta stripped of endothelium and stimulated by adrenaline – experimental study in rabbits 13–17
Aizawa Y, *see* Maruyama S *et al*
Alan D, *see* Ostadal P *et al*
Armentano RL, *see* Bia D *et al*
Asgary S, Naderi GH, Sarrafzadegan N and Gharypur M: *In vitro* effect of nicotine and cotinine on the susceptibility of LDL oxidation and hemoglobin glycosylation 117–120
Asgary S, *see* Naderi GA *et al*

Bia D, Grignola JC, Armentano RL and Ginés FF: Improved pulmonary artery buffering function during phenylephrine-induced pulmonary hypertension 19–24
Bogusławski W, *see* Chmielewski M *et al*
Borow A, *see* Levin RM *et al*

Calderón V, *see* Reynoso R *et al*
Castro G, *see* Franco M *et al*
Cattini PA, *see* Hirst CJA *et al*
Chen M, Li LY and Qi Y-P: Bcl10 protein can act as a transcription activator in yeast 97–103
Chmielewski M, Sucajtys E, Swierczynski J, Rutkowski B and Bogusławski W: Contribution of increased HMG-CoA reductase gene expression to hypercholesterolemia in experimental chronic renal failure 187–191
Choy PC, *see* Jiang YJ *et al*

Del Rizzo DF, *see* Zahradka P *et al*
Dias J, *see* Santos DL *et al*
Dubey ML, Hegde R, Ganguly NK and Mahajan RC: Decreased level of 2,3-diphosphoglycerate and alteration of structural integrity in erythrocytes infected with *Plasmodium falciparum in vitro* 137–141
Duraisamy Y, Gaffney J, Slevin M, Smith CA, Williamson K and Ahmed N: Aminosalicylic acid reduces the antiproliferative effect of hyperglycaemia, advanced glycation endproducts and glycated basic fibroblast growth factor in cultured bovine aortic endothelial cells: Comparison with aminoguanidine 143–153

Fernández B, Kampmann A, Pipp F, Zimmermann R and Schaper W: Osteoglycin expression and localization in rabbit tissues and atherosclerotic plaques 3–11
Franco M, Castro G, Romero L, Regalado JC, Medina A, Huesca-Gómez C, Ramírez S, Montaño LF, Posadas-Romero C and Pérez-Méndez O: Decreased activity of lecithin:cholesterol acyltransferase and hepatic lipase in chronic hypothyroid rats: Implications for reverse cholesterol transport 51–56
Fujimoto T, *see* Gan Y *et al*
Fuse K, *see* Maruyama S *et al*

Gaffney J, *see* Duraisamy Y *et al*
Gan Y, Taira E, Irie Y, Fujimoto T and Miki N: Arrest of cell cycle by Amida which is phosphorylated by Cdc2 kinase 179–185
Ganguly NK, *see* Dubey ML *et al*
Gharypur M, *see* Asgary S *et al*
Ginés FF, *see* Bia D *et al*
Grignola JC, *see* Bia D *et al*
Guzik P, *see* Tarchalski J *et al*

Hajek P, *see* Ostadal P *et al*
Hanawa H, *see* Maruyama S *et al*
Hatch GM, *see* Jiang YJ *et al*
Haugaard N, *see* Levin RM *et al*
Hegde R, *see* Dubey ML *et al*
Herlyn M, *see* Hirst CJA *et al*
Hirono S and Pierce GN: Dissemination of *Chlamydia pneumoniae* to the vessel wall in atherosclerosis 91–95
Hirono S, *see* Maruyama S *et al*
Hirst CJA, Herlyn M, Cattini PA and Kardami E: High levels of CUG-initiated FGF-2 expression cause chromatin compaction, decreased cardiomyocyte mitosis, and cell death 111–116
Horak D, *see* Ostadal P *et al*
Huesca-Gómez C, *see* Franco M *et al*

Inoue I, *see* Maruyama S *et al*
Irie Y, *see* Gan Y *et al*

Jiang YJ, Lu B, Choy PC and Hatch GM: Regulation of cytosolic phospholipase A_2, cyclooxygenase-1 and -2 expression by PMA, TNFα, LPS and M-CSF in human monocytes and macrophages 31–38

Kampmann A, *see* Fernández B *et al*
Kardami E, *see* Hirst CJA *et al*
Kartikey K, *see* Singh RB *et al*
Kato K, *see* Maruyama S *et al*
Kodama M, *see* Maruyama S *et al*
Kumar A, *see* Singh RB *et al*
Kutryk MJB and Ramjiawan B: Plasmid lipid and lipoprotein pattern in the Inuit of the Keewatin district of the Northwest territories 121–127

Levin RM, Borow A, Levin SS and Haugaard N: Effect of DHLA on response of isolated rat urinary bladder to repetitive field stimulation 129–135
Levin SS, *see* Levin RM *et al*
Li LY, *see* Chen M *et al*
Litchie B, *see* Zahradka P *et al*
Lu B, *see* Jiang YJ *et al*

Mahajan RC, *see* Dubey ML *et al*
Maruyama S, Kato K, Kodama M, Okura Y, Hirono S, Fuse K, Hanawa H, Nakagawa O, Nakazawa M, Miida T, Yaoita E, Yamamoto T, Inoue I and Aizawa Y: FR167653 suppresses the progression of experimental autoimmune myocarditis 39–44
Mates M, *see* Ostadal P *et al*
Medina A, *see* Franco M *et al*
Mesquita J, *see* Santos DL *et al*
Miida T, *see* Maruyama S *et al*
Miki N, *see* Gan Y *et al*
Montaño LF, *see* Franco M *et al*
Moon MC, *see* Zahradka P *et al*
Moreira Gomes O, *see* Aires Ferreira Rodrigues Borges A
Moreno AJ, *see* Santos DL *et al*
Morris DH: Methodologic challenges in designing clinical studies to measure differences in the bioequivalence of n-3 fatty acids 83–90

Naderi GA, Asgary S, Sarraf-Zadegan N and Shirvany H: Anti-oxidant effect of flavonoids on the susceptibility of LDL oxidation 193–196
Naderi GH, *see* Asgary S *et al*
Nakagawa O, *see* Maruyama S *et al*
Nakazawa M, *see* Maruyama S *et al*
Neki NS, *see* Singh RB *et al*
Niaz MA, *see* Singh RB *et al*

Okura Y, *see* Maruyama S *et al*
Ostadal P, Alan D, Hajek P, Horak D, Vejvoda J, Trefanec J, Mates M and Vojacek J: The effect of early treatment by cerivastatin on the serum level of C-reactive protein, interleukin-6, and interleukin-8 in the patients with unstable angina and non-Q-wave myocardial infarction 45–50

Palmeira CM, *see* Santos DL *et al*
Pella D, *see* Singh RB *et al*
Pérez-Méndez O, *see* Franco M *et al*
Pierce GN, *see* Hirono S
Pierce GN, *see* Zahradka P *et al*
Pipp F, *see* Fernández B *et al*
Podzuweit T, *see* Scholz D *et al*
Posadas-Romero C, *see* Franco M *et al*

Qi Y-P, *see* Chen M *et al*

Ramírez S, *see* Franco M *et al*
Ramjiawan B, *see* Kutryk MJB
Rashid H and Tayyab S: Interaction of bilirubin with native and protein-depleted human erythrocyte membranes 171–177
Regalado JC, *see* Franco M *et al*
Reynoso R, Salgado LM and Calderón V: High levels of palmitic acid lead to insulin resistance due to changes in the level of phosphorylation of the insulin receptor and insulin receptor substrate-1 155–162
Romero L, *see* Franco M *et al*
Rutkowski B, *see* Chmielewski M *et al*

Salgado LM, *see* Reynoso R *et al*
Santos DL, Palmeira CM, Seiça R, Dias J, Mesquita J, Moreno AJ and Santos MS: Diabetes and mitochondrial oxidative stress: A study using heart mitochondria from the diabetic Goto-Kakizaki rat 163–170
Santos MS, *see* Santos DL *et al*
Sarraf-Zadegan N, *see* Naderi GA *et al*
Sarrafzadegan N, *see* Asgary S *et al*
Sass S, *see* Scholz D *et al*
Schaper W, *see* Fernández B *et al*
Scholz D, Thomas S, Sass S and Podzuweit T: Angiogenesis and myogenesis as two facets of inflammatory post-ischemic tissue regeneration 57–68
Seiça R, *see* Santos DL *et al*
Shen GX: Impact and mechanism for oxidized and glycated lipoproteins on generation of fibrinolytic regulators from vascular endothelial cells 69–74
Shirvany H, *see* Naderi GA *et al*
Singh RB, Neki NS, Kartikey K, Pella D, Kumar A, Niaz MA and Thakur AS: Effect of coenzyme Q10 on risk of atherosclerosis in patients with recent myocardial infarction 75–82
Slevin M, *see* Duraisamy Y *et al*
Smith CA, *see* Duraisamy Y *et al*
Sucajtys E, *see* Chmielewski M *et al*
Swierczynski J, *see* Chmielewski M *et al*

Taira E, *see* Gan Y *et al*
Tarchalski J, Guzik P and Wysocki H: Correlation between the extent of coronary atherosclerosis and lipid profile 25–30
Taylor CG, *see* Zahradka P *et al*
Tayyab S, *see* Rashid H
Thakur AS, *see* Singh RB *et al*
Thomas S, *see* Scholz D *et al*
Trefanec J, *see* Ostadal P *et al*

Vejvoda J, *see* Ostadal P *et al*
Vojacek J, *see* Ostadal P *et al*

Wigle J, *see* Zahradka P *et al*
Williamson K, *see* Duraisamy Y *et al*
Wysocki H, *see* Tarchalski J *et al*
Yamamoto T, *see* Maruyama S *et al*
Yaoita E, *see* Maruyama S *et al*

Yurkova N, *see* Zahradka P *et al*

Zahradka P, Yurkova N, Litchie B, Moon MC, Del Rizzo DF and Taylor CG: Activation of peroxisome proliferator-activated receptors α and γ1 inhibits human smooth muscle cell proliferation 105–110
Zahradka P, Wigle J and Pierce GN: Preface 1
Zimmermann R, *see* Fernández B *et al*
